

# Parent and Peer Relationships During Adolescence

Researchers at Deakin University are studying how teenagers' relationships change over time. We are particularly interested in how they share personal information with their parents and friends.

**We're looking for 11 to 15 year old girls to participate!**

Families will get a **\$30 Coles Myers voucher**

Sessions can take place **online!**

They take 1.5 hours, and involve completing some surveys & computer games (on sharing thoughts/feelings with others)

Deakin University ethics approval (Ref #2020-049)
