Keep scrolling to read about the journey the team and your lights took.

Your lights were delivered to
Papua New Guinea

Papua New Guinea is one of the most beautiful and unexplored places on the planet. Its coral coast lines are rich with aquatic life and its misty highlands form a wondrous barrier that until recently cut off much of the population from the outside world and each other.

Only 6.3% of the rural population has access to grid electricity or generated electricity. While education may be the best way forward, the opportunity to study and learn is limited to daylight hours. The price of burning fuel for lighting and cooking is expensive, while those who can afford to burn fuel for light are at risk for serious respiratory diseases.

Thank you to our NGO partner, KTF

It's a long and bumpy road to distribute SolarBuddies in PNG, and it's only made possible with the support of our field partner KTF (Kokoda Track Foundation).

KTF is an Australian aid organisation operating in PNG. KTF works with people and communities to improve the lives and futures of Papua New Guineans.

A large group of school children in green uniforms are standing in a long line outside a green building with a corrugated metal roof. In the foreground, a person is walking away from the camera, carrying a yellow bin. The scene is set outdoors with trees and a clear sky in the background.

Your lights were distributed to Motu Koibatu

Despite its proximity to the nation's capital, many households in the Motu Koitabu area do not have access to the electricity grid due to the high cost of connection.

Motu Koibatu is known to be the traditional home to the landowners of Port Moresby.

Through rough terrain, the KTF team travelled by land from Port Moresby to Motu Koibatu to reach three schools – Hagara Primary School, Baruni Primary School and Baruni-Life Care Mobile School to distribute much-needed SolarBuddy lights.

BUDDY

Players from Australian NRL teams, the Cronulla Sharks and Canterbury Bulldogs, helped us deliver SolarBuddy lights to the students. The students were overwhelmed with both their new solar light and the opportunity to meet their sporting icons.

KTP

My daughter is in grade 8 and was given the solar light. The little light helps her to read at night unlike our household panels you cannot read your book closer.

Mr. Henao Koregai, Head Teacher,
Hagara Primary School

Your Combined Impact

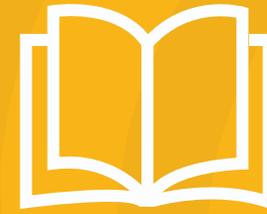

2250

Lights distributed
