

Stargazing - Casey Grammar

You are invited to join me and my colleagues from the Casey Grammar Science Faculty on an unusual tour of the night sky.

WHEN?

Thursday 17 September at 7:30 p.m.

WHAT DO I NEED?

and

and

Binoculars (wide field, 10x50)

WHAT WOULD BE NICE (BUT NOT NECESSARY) TO USE?

HOW DO I LOG ON? Let us [Google Meet](#) using the code **MAGELLAN**

HOW WILL THE STARGAZING WORK?

- A PowerPoint presentation will provide descriptions of celestial objects.
- Use an app to help you locate the objects described in the PowerPoint.
- Each slide is separated by a suitable time interval, giving you a reasonable opportunity to locate each of the objects presented.

HOW CAN I PREPARE FOR THE NIGHT SKY VIEWING?

- Familiarize yourself with the *Star Walk* or *Sky Safari* app.
- Allow your eyes to get accustomed to the dark prior to the start time.
- Set your app to *Night Mode* (red screen) and dim your computer too.

The prevailing conditions will necessarily determine the viability of this event, so please monitor the [Casey Grammar Facebook page](#) for possible, scheduling changes. Should visibility be low or poor, this event will be rescheduled to a date in early October.

- I hope to see you in your backyards, enjoying the awe of the night sky.

Star Walk app (free version)

Sky Safari app (with voice control)
